14. (New) Safety device for a bracelet, made up of a system with a sliding effect, make it possible to adapt the bracelet length to the size of the wrist ; wherein said system comprises :
 - two elongate elements having slots and notches, said elongate elements being guided by grooves and said slots,
 - a recto-verso button located between said slots and allowing said elongate elements to be slid and to be stopped at the end of their motion,
 - stop reliefs or conical narrowings provided on said grooves and allowing said elongate elements to be stopped when they arrive at their maximum elongation,
 - a clasp for fixing said elongate elements when the desired position at the desired dimension is obtained.
